User Flows & Wireframes

A user flow is how the user accesses and navigates your content.

1
Figure out what's most important.

2

Figure out how the user is accessing the content.

3
Map it out.

About

A wire frame is a stripped down layout design that focuses on content and structure, and omits design.

View Sketch File to show process, work flow and cool Sketch features (plugins, styles, symbols, pages etc.)
