Sign Generator 1.0, Norm

Sign-Generator 1.0

Secure | <https://lineto.com/The+Designers/Norm/Sign-Generator/Software/Sign-Generator+1.0/>

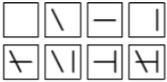

Developed by Norm & Jürg Lehni 10.2002

Sign-generator 1.0

The Sign-generator 1.0 is a tool that allows you to calculate and generate all possible combinations of a number of lines. The lines are defined on a 9 point grid. The Sign-generator 1.0 allows you to print these signs and to export them as an eps-file. [export only on www.norm.to].

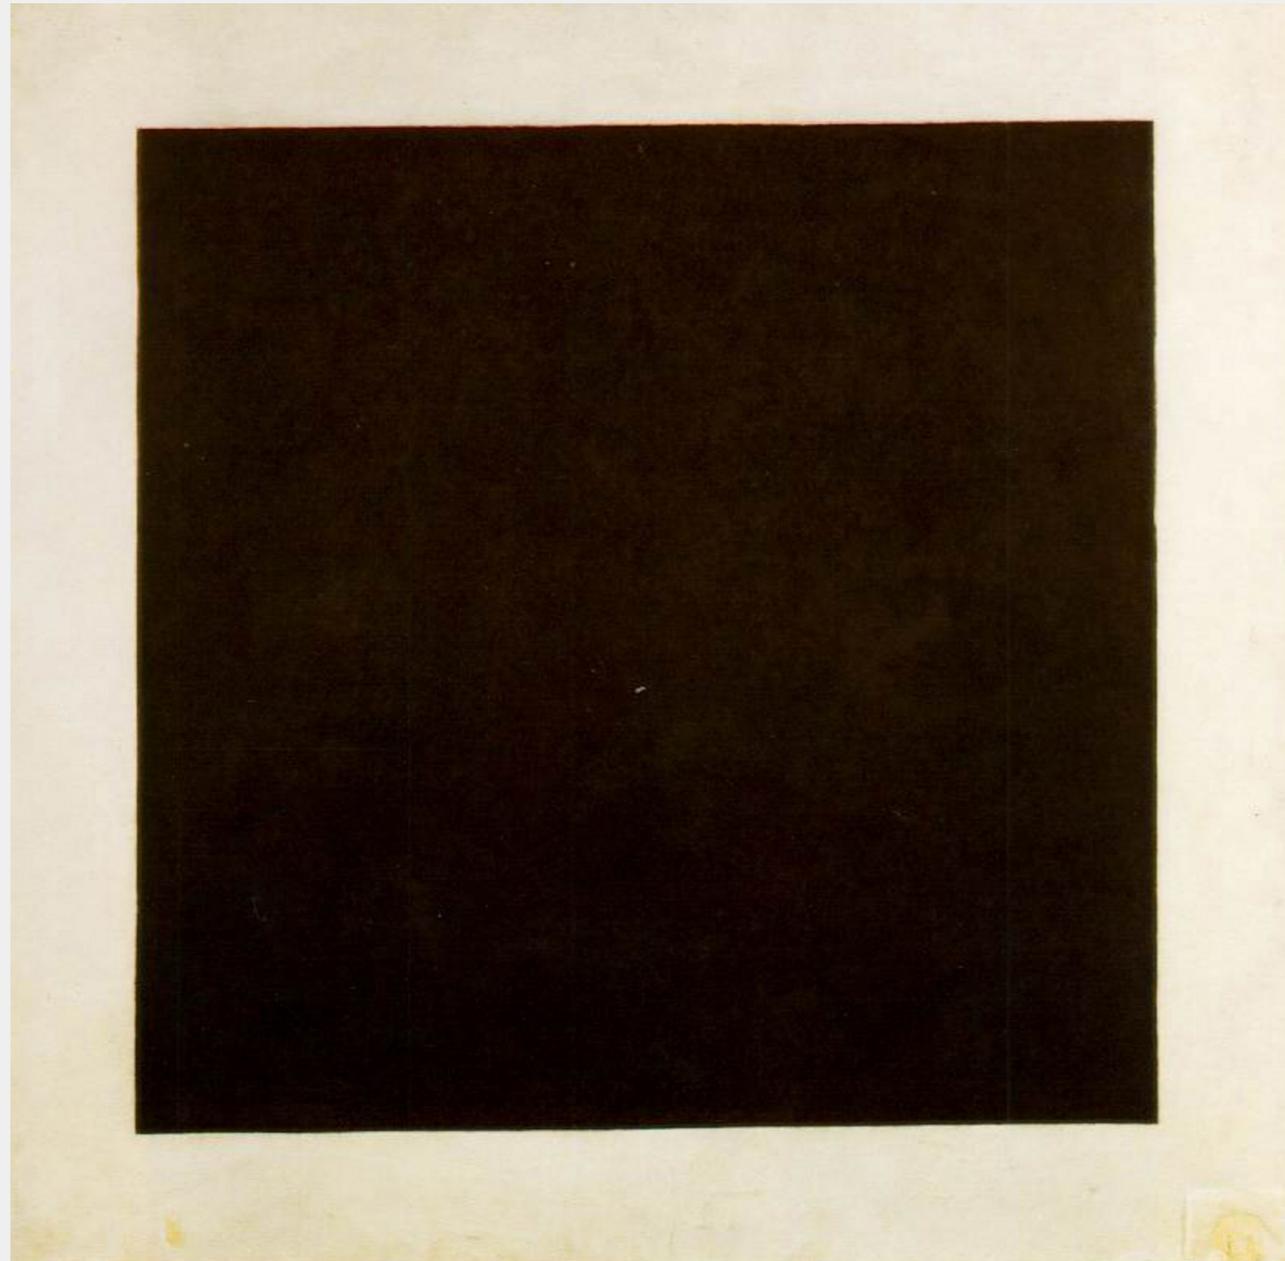

STEP 1: Select between 1-36 lines on the GRID. Press "RESEL" to make a new selection.
STEP 2: Press "GENERATE" to preview all signs (combinations). Scroll if necessary.
STEP 3: Print the actual signs (page) on screen.
STEP 4: Press "HELP" for informations.
STEP 5: Start

Examples:

			
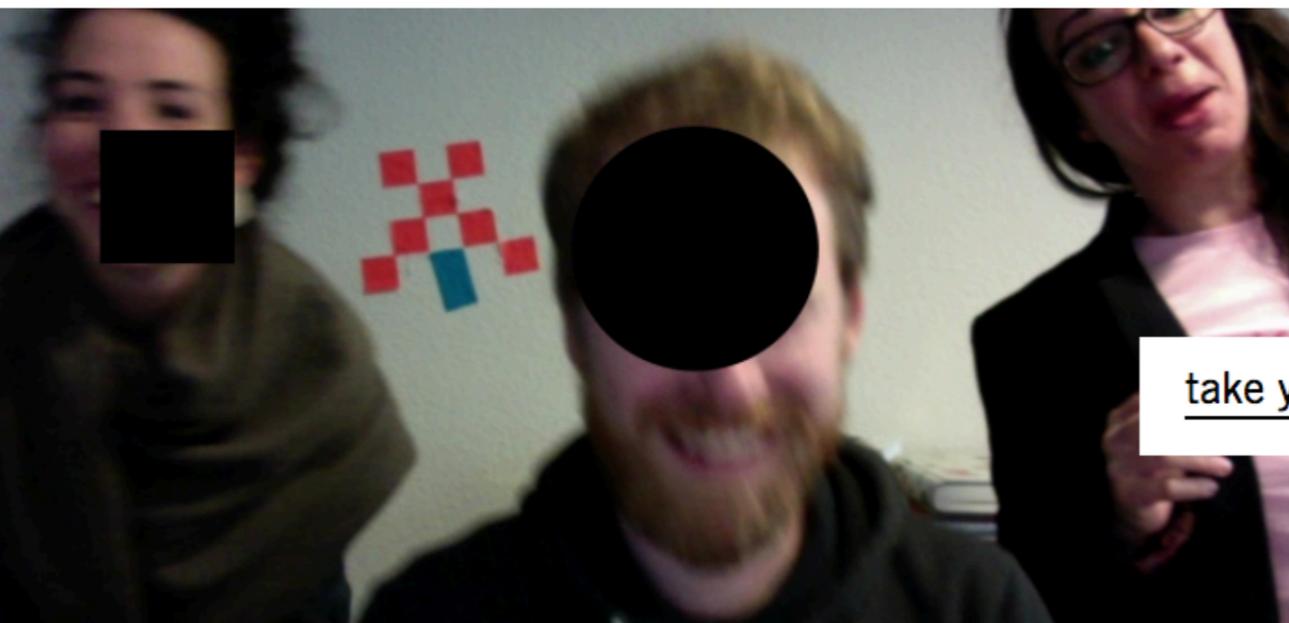

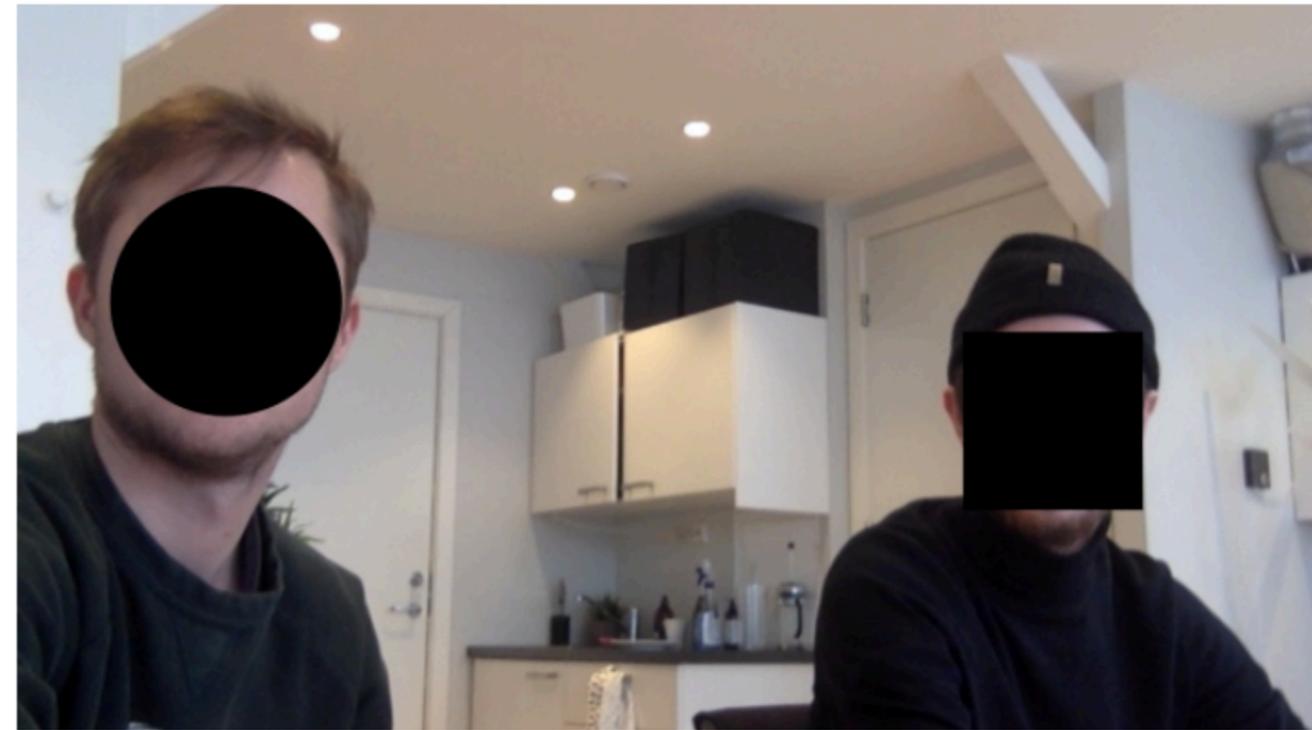

Grid 9/9/1-36 This 9 point grid allows to create 36 different lines.	Selections Select two points of the grid to create a line.	Lines The selected lines appear in the black field.	Output Possible combinations of 3 selected lines.
